Attorney Docket No. ZLX-HUL-003

Please delete the section heading **“BRIEF DESCRIPTION OF THE DRAWINGS”**.

Please delete paragraph [0008].

Please amend paragraph as indicated [0053] below:

[0053] ~~FIG. 1 illustrates an~~ One exemplary device ~~100 including~~ includes transport layers and an emissive layer. ~~In FIG. 1, the~~ The exemplary device ~~100~~ includes a transparent substrate ~~102~~, an anode ~~104~~, a hole injection layer ~~106~~, a hole transport layer ~~108~~, an emissive layer ~~110~~, an electron transport layer ~~112~~, an electron injection layer ~~114~~, and a reflective cathode ~~116~~. The anode ~~104~~, hole injection layer ~~106~~, hole transport layer ~~108~~, emissive layer ~~110~~, electron transport layer ~~112~~, electron injection layer ~~114~~, and reflective cathode ~~116~~ form an organic light emitting device (OLED) ~~118~~. The anode ~~104~~ may be made from indium-tin oxide or another suitable transparent, conductive material. The cathode ~~116~~ may be made from a reflective, low work function metal such as aluminum, magnesium/silver alloy, calcium, or another suitable material. Alternatively, the device may be transmissive. The materials disclosed herein may be used to form, for example, one or more of the hole transport layer ~~108~~, the emissive layer ~~110~~, and the electron transport layer ~~112~~. The other layers may be formed from any of the suitable materials that are known in the art. Alternatively, additional layers, such as a photoalignment layer, may be included in the device ~~100~~ and one or more of the recited ~~illustrated~~ layers may be omitted.
